## Technical Data Sheet SPI-1226

**Chemical:** Proprietary Blend of Nonionic and Cationic Surfactants

### Description:

SPI-1226 is Silicones Plus Inc.'s new optimized surfactant blend designed for water-based degreaser formulations.

SPI-1226 is intended to be used as the only surfactant together with chelating agents and builders in water-based cleaning formulations. However, the product can be combined with other nonionic or cationic surfactants to achieve more nuanced degreasing properties. Formulators should be aware of the possibility of negative effects if anionic surfactants are used. SPI-1226 is designed to be a versatile and highly effective cleaner. It can be used in acidic, neutral, and alkaline systems.

### Applications:

- Vehicle and Engine Cleaning
- Industrial Cleaning
- Descaling Products
- All Purpose Institutional Cleaners

### Typical Properties

<i>Active %</i>	99.0 min.
<i>Water %</i>	1.0 max
<i>pH, 10%</i>	6.0 – 8.0
<i>Specific Gravity @20°C</i>	1.035
<i>Viscosity, cPs</i>	150 – 300
<i>Ionic Character</i>	Nonionic, Cationic
<i>Color, Gardner</i>	10 max
<i>Water Solubility</i>	Soluble
<i>Appearance</i>	Clear to Slightly Turbid, Amber Liquid
